EMPOWERING WOMEN LEADERS

EMERGING MANAGERS IN STEM FROM SPECIALIST TO STRATEGIST

About the Program

Emerging women leaders working in STEM fields are equipped with the tools they need for success as new and advancing managers.

Through experiential sessions and group discussions world-renowned faculty instill theory, skills, and experiences that propel women in their professional lives and beyond.

Peer-to-peer networking opportunities both during and after the program foster powerful lifelong connections.

Participants return ready to articulate their leadership vision and carry out career-transforming action plans developed throughout the program.

Who Attends

New managers or functional specialists slated for future leadership roles working in STEM. Typical titles: Project Manager; Senior Researcher; Team Lead; Technical Lead.

Key Takeaways

During the program, participants hone their abilities to:

- Problem solve and collaborate under complicated circumstances
- Develop leadership presence
- Maximize performance in an on-demand world
- Learn negotiation skills and win buy-in for optimal results
- Communicate effectively under pressure with teams
- Create a culture of candid feedback to achieve great results
- Invest in personal health and well-being for sustainable career success

LOCATION: Smith College, Northampton, MA

CONTACT: Meredith Courtney, mcourtney@smith.edu, (413)585-2586

We are proud to collaborate with the Society of Women Engineers (SWE), the world's leading professional organization for women engineers.

“

The program was so unique and comprehensive—the best professional training experience I've ever had. I was surprised by how powerful and emotional it was. The sessions were thoughtful, relevant, and flawlessly executed.
